

Office to enterprise Product Data Management

DDM Office is an easy to use document and project data management solution enabling you to access, review and update all of your information. Out of the Box and scalable, DDM will grow in line with your business and changing requirements.

DDM Office can be used for non-design staff to access design information and view CAD parts and drawings which are saved in PDF format allowing information to flow freely between departments.

Key Features

- **Powerful search and retrieval facility** to access the right documents quickly and easily
- **Change management** to automate and track the revision and issue of documents
- **Business process management** and visibility via graphical workflow mapping
- **Full audit history** recorded throughout the document or product lifecycle
- **Scalable** from small office to global multi site environments
- **Secure configurable access control** for all users
- **Internet access** via DDM Web Client

Key Benefits

- **Increase productivity and efficiency**
- **Avoid duplication of effort and information**
- **Guarantee you are working on the latest information**
- **Achieve full compliance** with workflow and audit history
- **Streamline your business** by highlighting and reducing bottlenecks in your processes
- **Immediate secure global access** for your enterprise teams, customers and suppliers
- **Full control** over who can see what and when
- **Easy to implement,** stable, affordable and user friendly
